

Welcome to Dantco Mixers

As a significant leader in dispersing and mixing technologies, Dantco Mixers Corporation offers a large selection of laboratory-scale and production high speed dispersers, mixers/agitators, multi-shafts mixers/dispersers, rotor/stator homogenizers, horizontal or vertical ribbon blenders to provide reliable performance for each and every application.

The dispersers, mixers, rotor/stator, may be supplied in fixed, dual and variable speeds, post mounted or tank mounted with mechanical drives or electronic drives (DC or AC) with standard controls or explosion proof controls.

Accessories for this equipment, such as high speed blades, mixing shafts, low speed turbines, belts, pulleys, motors, valves, instruments and controls, can locks are stocked and ready for shipment.

Dantco Mixers also offers a selection of process tanks in fixed or portable configuration, open top with removable lids or closed top with vacuum/pressure seals, standard or jacketed (pocket or half pipe), polished or mill finish, and storage tanks in cylindrical or square configuration, all in carbon steel or stainless steel. Tank accessories, such as tank covers, manholes, drain valves, insulation, vacuum/pressure seals are stocked and ready for shipment.

Skidded Process Equipment, Turnkey Systems, Extruder Presses, Can Crushers, Ribbon Blenders, Planetary Mixers, Auger Extruders, are also offered on special orders.

Dantco Service Department provides preventive maintenance, testing and validating, repair and refurbishing on all above equipment in addition to competitors equipment, such as dispersers, mixers, shot and sand mills, SW mills, rotor/stator, double planetary mixers, sigma blades mixers, auger extruders, vacuum/pressure vessels, etc., providing spare parts and spare assemblies at site or shop.
