36	.500	685.00	820.00	840.00			

Quantity Discounts (standard thickness, any combination): 6 units and above 10%, 11+ units 15%.
Other blank thickness are available up to 7 ga for most types and 1/4" for type HSG.

All prices are FOB Paterson, N.J.

Delivery is from stock on most standard units.

Boring, drilling, and keying are charged according to complexity and are quoted on request.

Standard metal is SS304. For SS316 add 40%. Polyurethane units are non sparking material.

Hard Chrome or Plasma Spray is optional on SS units. These coatings are usually applied near the edges only, where it is susceptible to wear.

Blade Holding Plates are recommended for blades 6" and larger. Plates are usually 2" to 3" smaller than blade diameter. (See price sheet for Blade Holders).

Most of the above blades may be mounted on stainless steel hubs with set screws for easy installation on dispersing shafts. See separate Price Lists for these items.

Price and specifications may change without notice. Call factory for latest prices & delivery.

Revised: 1/10/13
