

## **BLADE, BUNG OPENING**

**MODEL BBO-18-1 3/8-SS**

**MODEL BBO-04-1/2-SS**

Features:

- 2-blade, hinged
- bore with set screws
- SS304 or SS316
- sizes up to 20" diameter
- bung openings up to 6"

These blades slide through the bung hole of the drum or the opening of tote bin. The 2 blades open to full diameter while the mixing shaft is rotating. Thus creating some shear and mixing action or keeping the product in suspension.

Models shown are 18" in diameter with 1 3/8" bore for 6" bung hole and 4" in diameter with 1/2" bore for 2 1/2" bung hole.

Standard stainless type is 304. Stainless type 316 is optional and at higher prices

These models are offered in diameters ranging from 2 to 20" with optional bore sizes.

Mixing shafts in length from 10" and up are available with any of these blades.
