

TURBINE, RUBBER COATED

MODEL AFF3-SR-12-RC

Features:

- Axial flow, 3-blade, 12" dia.
- Stabilizer ring, welded
- Mixing shaft, welded
- Rubber coated, vulcanized process

The rubber coated turbine can withstand high corrosive products including hydrochloric acids. It is much more economical than Hastelloy. Carbon steel is easier to machine also. Sizes up to 60" in diameter may be considered for this process.
