

REFURBISHING/REPAIR

KNEADER, HEAVY PASTE BAKER-PERKINS

Features:

- Work Capacity, 350 gallon
- Motor, 300 HP, 1750 rpm, TEFC 3/60/480 rpm
- Sigma blades speed, 60 rpm
- Jacket, not useable
- Tilt, hydraulic with hydraulic power pack and limit switches tilt control

The unit was rigged and transported to our factory where it was completely disassembled to expose all drive components, such as chain drive sprockets, gears, bearings, shafts and seals (Teflon packing type).

The top 2 pictures show the unit as it came in our factory, rusted, decayed, and ready for the junk yard.

The bottom picture shows the unit refurbished and tested to the original specifications, ready for reliable and smooth operation.
