

## REFURBISHING/REPAIR

### KNEADER, HEAVY PASTE BAKER-PERKINS

#### Features:

- Work Capacity, 350 gallon
- Motor, 300 HP, 1750 rpm, TEFC  
3/60/480 rpm
- Sigma blades speed, 60 rpm
- Jacket, not useable
- Tilt, hydraulic with hydraulic power pack  
and limit switches tilt control

The unit was rigged and transported to our factory where it was completely disassembled to expose all drive components, such as chain drive sprockets, gears, bearings, shafts, seals (Teflon packing type), and all the hydraulic components with electro-mechanical controls.

The pictures show the unit refurbished and tested to the original specifications, refinished and ready for reliable and smooth operation.
