

SERIES 3001  
MODEL DPM-075-46-EX  
5 GALLON PAIL MIXER  
FIXED LOW SPEED (46 RPM)  
PORTABLE

APPLICATION: MEDIUM VISCOSITY  
MOVEABLE TO JOB SITE

FEATURE: Pail rotates, impeller stationary

SPECIFICATIONS:

- ¾HP motor, explosion proof
- on/off switch, explosion proof
- Fixed low speed compound drive
- 115V, 60 Hz, 8 Amps, input power
- pail rotation: 46 rpm
- double mixing paddles impeller, removable

This is a heavy duty production type 5 gallon Pail Mixer with oversized bearings and shafts and strong stand for use in extreme rugged working conditions. Because of its low rotational speed, it will be able to mix medium viscosity pastes, adhesives, epoxies, slurries, etc. It is simple to operate, completely portable for job site applications, and absolutely safe to use due to the drive system being totally enclosed.

The 5 gallon full pail is easily inserted in the holding nest and easily removed after mixing. The double vertical paddle impeller is stationary and removable for cleaning, and provides axial and radial movement of mixing material with wall and bottom scraping capability for thorough mixing.
