

The top picture shows a Dantco post mounted, variable speed, Disperser, Series 2030, 100 HP, explosion proof, with (2) SS304 tanks with tapered bottom, mezzanine mounted, with hinged tank covers, fill piping and flow meters, drain piping hooked-up to diaphragm pumps, control panel with push button controls, digital tachometers and ammeters. Visible also is the working platform built by the customer. This heavy duty Disperser system is used to process latex paint.

This platform held (2) Dispersers systems including (4) 1000 gallon tanks for continuous operation.

This picture shows a working platform serving aggregate bins. Notice the comfortable steps leading to the solid steel deck and the removable railing built to OSHA specifications. The platform was fabricated in modular form ready to be assembled at the job site with simple tools.
