Series 2010 Dispersers are offered in standard motors horsepower from 3 to 100 HP.

Variable speed is achieved by the use of variable pitched pulleys available off the shelves.

Through-the-floor designs are available

The safety switches group (height limit and can lock switches) are wired in series with the ON/OFF switch so to stop the motor at predetermined lift height, thus prevent operation of mixing shaft, or if change can is disengaged (or gets loose). This safety system is used to prevent injury to personnel and damage to equipment.
