- motor starter with heaters, explosion proof
- motor & starter wiring (humidity proof)
- air lift & controls
- front speed control

The 2 pictures show the flexibility that this model has for reliable operation in the lab or in the pilot line.

The containers that can be used with this model for bench mounted operation will have handles to move them around. Containers capacity could range from 1 gallon to 5 gallons.

Containers with wheels for ease of movement could be supplied in the range of 5 gallons to 20 gallons provided the disperser is floor mounted.

This heavy duty model has proven drive system consisting of fixed center variable pitch pulleys set with one belt. The 2 mixing shaft bearings in a machined bearing housing will assure most reliable operation. All components are off-the-shelf and available from Dantco Corp. or from your power components distributors in your area.
